PROFESSIONAL EXPERIENCE

- **Nolock / Squadreon** – June 2022 – January 2023

As a User Interface Designer, I created wireframes and applications, implementing advanced methodologies such as atomic design. I optimized the performance and accessibility of products, always prioritizing the user experience.

Taking on the role of a tester led me to delve into new technologies, an experience I found fascinating. This opportunity also allowed me to work professionally with Scrum methodologies.

- **FabricARG** – July 2022 – November 2022

Internship at a local company, focused on learning and applying technologies such as C# and SQL Server. During my internship, I gained practical skills in using these tools through exercises and training activities.

EDUCATION

- **Córdoba Higher Technical Institute**
Software developer

During my years of study, I have academically learned C#, Python, Haskell, HTML, CSS, jQuery, and Java.

February 2020 – June 2024

- **National University of Cordoba**
Public English Translator

March 2017 – June 2018

COURSES

- React and Redux.
React Router, TailwindCSS, Context Y Hooks. – Udemy
